**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

Claims 22-27, 43-51, 66 and 82-84 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on July 27, 2006.

#### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-10 and 80 are rejected under 35 U.S.C. 102(e) as being anticipated by Sites et al US Patent Number 6,413,233.

Sites et al discloses a method for removing an agent from a physiological efferent fluid collection site, the method comprising introducing a non-occlusive aspiration element (410, Fig. 2E) to a target aspiration site adjacent the physiological efferent fluid collection site; and

activating the aspiration element when the agent is at least predicted to be present is the target site to selectively remove the agent from the physiological efferent fluid collection site (col. 10 line 21); wherein the physiological efferent fluid collection site is a human coronary sinus cardiovascular fluid collection site and wherein the agent is a therapeutic agent, a diagnostic agent (col. 6 line 57); and wherein the element comprises a detector is located upstream of the non-occlusive element (see figure 2A).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 81 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sites et al in view of Stevens et al US Patent Publication 20010044591 A1.

Sites et al discloses the method as described above in reference to claim 80, but fails to disclose that the detector is fiber-optic.

Stevens et al disclose a similar method wherein the detector is fiber-optic (paragraphs 32).

It would have been obvious to one having ordinary skill in the art at the time of invention by applicant to modify the method of Sites et al by adding the step of using a fiber-optic detector as taught by Stevens et al, in order to locate the target site and better isolate the fluid.

***Response to Arguments***

Applicant's arguments with respect to claims 1-10, 22-27, 43-51 and 66-84 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aamer S. Ahmed whose telephone number is 571-272-5965. The examiner can normally be reached on Monday thru Friday 9-5.
